

F No. 11017/29/2019-AIM
Atal Innovation Mission
NITI Aayog
Government of India

Subject: Closure of compliance process for schools selected for establishment of ATL in the first and second rounds of ATL application.

Atal Innovation Mission (AIM) is establishing Atal Tinkering Labs (ATL) in schools across the country. AIM has invited applications from schools for the establishment of ATLs in their schools through several rounds. As a response, thousands of schools had applied for this scheme.

As a result, schools mentioned in the table mentioned below were selected for the establishment of ATL. The establishment and disbursement of ATL grant-in-aid funds are subject to fulfilling the compliance process which is outlined and available on the AIM website which inter-alia includes confirmation of requisite built up space for ATL, PFMS registration, and submission of MoA and Bond form as per ATL guidelines.

In pursuance of the above guidelines, several schools have completed their respective compliance process and received the ATL grant-in-aid. However, many schools in the list failed to fulfil the compliance norms despite several extension of deadlines, which were communicated to them periodically.

Since it is not feasible to keep the process of compliance open for indefinite period, it is now been decided by the competent authority to close the compliance process for the lists of selected schools as given in the table mentioned below with immediate effect. As such, no further communication from the schools which failed in the compliance process shall be entertained in future.

Table: Links for the list of schools selected for ATL establishment

Sr. No.	List of schools selected for ATL establishment	Link
1.	List of 257 schools	https://aim.gov.in/pdf/Final-List-of257Schools-ATL.pdf
