“India does not live in its towns but in its villages, Mahatma Gandhi wrote this in Young India during 1931 and inspired Indians to pave way from Gramodaya to Rashtrodaya. Our Prime Minister, Shri Narendra Modi has declared that when our villages are transformed, India will be transformed. Both these passionate thoughts confluence in this wonderful platform called Atal Tinkering Labs. This is a greater opportunity for the Government and aided schools to get equipped with the latest advancements and expose their students to an enriching innovation experience.”

"There is no secret ingredient  
We all have the ability to find  
solutions to our problems so we  
just need to broaden our horizon  
and find solutions for bigger  
problems that affect the masses.  
Innovation is just a different  
way of thinking about the same  
problem."

"Innovation and Creativity is  
not bound by age. Children are  
one of the best innovators and  
logical minds. India needs to let  
these young minds experiment,  
fail and succeed to become a  
truly Innovation led economy.  
When I saw class 6th students  
eager to work on the solar  
lamps. The smile and pride on  
their faces after successfully  
assembling and operating the  
solar lamps was priceless."

"It takes one to teach but two to learn. While I visit the school and engage with the students - there is so much that I learn from them. There is a freshness and diversity of thoughts, students are beaming with ideas and they are more aware than we can even imagine. I believe today more than the resources, what students truly need is someone to listen their ideas and thoughts, someone to enable them on their onward journey towards fulfilment of dreams and a 'saarathi' to constantly channelise their energy in the right direction."
